

The Faculty of Electrical Engineering has over ninety years long history. Several major departments, including Electromechanics, came into existence in 1921, when the former *National School of Civil Engineering* (established in 1864) grown into the Polytechnic School of Bucharest, as consecrated by the royal edict endorsed by Ferdinand, King of Romania (June 10, 1921).

Today, the *Faculty of Electrical Engineering* provides higher education curricula (at undergraduate and graduate levels), and conducts research in theoretical and applied electromagnetism, in areas of low frequency, low and medium voltage, medium and high intensity currents, including: electromagnetic fields and electrical circuits, energy conversion and sources, metrology, measurement systems, electrical machines and apparatus, power electronics, electrical drives and motion control, bioengineering, electro-technology, CAD in electrical engineering, management, electromagnetic compatibility, etc.

The Faculty of Electrical Engineering is founder of the National Consortium of Electrical Engineering Faculties, the nation wide academic network of the seventeen faculties of electric engineering.
